Dear Hiring Manager,

I am excited to apply for your Backend Developer position at Unified. As an engineer with more than 10 years of experience bridging education, service, and performing arts technologies, I'm certain I can add value and a unique perspective to your solution development team. As a candidate with a strong sense of community and an optimistic outlook, I am excited to grow with your team and to be a part of the change I want to see in the world.

During my undergraduate tenure at Western Governors University, I gained web and software development experience through my Computer Software Engineering degree program to complement my existing degree in Theatre from Texas A&M University-Commerce.

My excellent program development, testing, and debugging allow me to produce and review quality code that requires less revision and more fluent documentation. I pair outstanding collaboration and communication with thorough review to support team members in producing high-quality modular code together.

I'm grateful for your time and consideration. I look forward to speaking with you regarding my candidacy and helping Unified achieve current and future business objectives.

Thank you again,

Jake C. Hood
